

INFOSERV360°

Client Success Story

Conglomerate

INFOSERV360° deployed **HPE Aruba** & **Juniper** solutions to revamp the customer's network infrastructure, including Aruba CX Series network switches, Juniper routers, Aruba Wi-Fi 6 access points, & Aruba ClearPass for Network Access Control (NAC)

INFOSERV360°

Client Challenge

The customer needed a scalable and secure network infrastructure to support both wired, wireless & IoT devices. Their **existing setup lacked centralized management, seamless authentication, and visibility into network access**. Additionally, they required an upgrade to handle increasing operational demands while maintaining Zero-Trust security and compliance

INFOSERV360°

Impact & Outcome

The solution provided by INFOSERV360° **improved network performance** with HPE Aruba CX switches, Aruba Central, Juniper routers, Aruba Wi-Fi 6 access points & Aruba ClearPass policy manager, ensuring **seamless connectivity and zero-trust security**.

Upgraded policy-based authentication and AI-powered automation **optimized efficiency**, enabling scalable and secure operations
